## QUALITY AND ENVIRONMENT POLICY

J-VIGAS S.A. is a company that is committed to comply with the requirements of our customers and with the regulatory requirements, legal and health aspects that apply and that allow us to manufacture safe and legal products.

**The premise at J-VIGAS is to guarantee quality through product homogeneity on three levels: sensory, physical and visual, ensuring safety, authenticity, sustainability and protection of society and the environment.**

The production processes at J-VIGAS are environmentally friendly, applying measures that are put into practice by the human team, with the aim of minimizing the negative effects on the environment. In this sense, we work to reduce the environmental impact, we encourage the rational use of natural resources and a clear awareness of favoring our environment, not only through our work but also by involving all our suppliers and customers.

**J-VIGAS is committed to protecting the environment, including pollution prevention and the sustainable use of resources.**

The J-VIGAS team works under ideal conditions in terms of maintenance of the facilities, order and cleanliness, working environment and safety; they are trained and informed about everything related to their work place. From the point of view of continuous improvement and safety, J-VIGAS takes into consideration all the suggestions provided by the staff.

J-VIGAS is a company based on two pillars:

- Great respect for tradition and experience gained through the generations past and present, with more than 130 years of history.
- Adaptation of the latest technological trends, which allow modernization and continuous improvement.

**The combination of tradition and modernity makes it possible to make a cork of the best quality.**

Customer satisfaction is a basic principle for J-VIGAS. That is why it is essential to establish a balance between the costs of structure and research and the control of the production process and the quality of raw materials, concluding a correct dimension of the company.

This dimension strengthens the five basic concepts on which we invest our efforts:

**Quality:** Obtained through consistency in the combination of raw material control, compliance with process requirements and meeting customer needs, through the Quality Management System.

**Environment:** We ensure compliance with applicable regulations through our Environmental Management System.

**Service:** Through the permanent provision of both technical and commercial staff to the needs and suggestions of our customers. This arrangement is the result of the correct size of the organization.

**Customization:** The direct contact between the technical and commercial staff with the clients allows total proximity.

**Safety:** This is achieved by applying the HACCP-based Food Safety Management Systems.

The total commitment of both the management and the human team of J-VIGAS is to produce stoppers of the highest quality. That is why we use all means to guarantee the supply of cork stoppers that ensure the best preservation of our customers' still and sparkling wines. We ensure a rigorous traceability, in order to be able to identify any incident that may arise in the production process. This commitment is achieved by involving all the company's staff to actively participate in promoting a culture of food safety, to ensure and improve the quality and safety of the products.

Management makes this policy accessible and makes it available to its customers, all its employees, suppliers, and other interested parties.

The Policy is kept up to date through periodic reviews, coinciding with reviews of the system by management, in order to take into account changes in environmental conditions and information received. In this sense, the management provides and will provide all the human, technical and economic means necessary to achieve the objectives and goals that are established, scheduled, and periodically.
